NOTE: The data in the quarterly summary reports are provisional, based on current reports in the Michigan Disease Surveillance System (MDSS) made available to local public health departments. The MDSS is a continually active system so counts of diseases are constantly changing as cases are investigated, confirmed as cases, or ruled out as not meeting case definition. Each quarterly surveillance report reflects this constant activity as the numbers may slightly fluctuate each quarter. Therefore, it should be kept in mind that numbers in the quarterly disease reports are not final and should be used only to generally monitor trends over time. Probable and confirmed cases are included in this quarterly report.
