

# PROJECT STATUS REPORT

## Allegan County Radio Project Week Ending: December 8, 2017

### 1. Project Status Summary

- i. Fire vehicle radio installations continue to progress well
- ii. Punch list items being eliminated as task are completed

### 2. Work Completed Last Week

- i. Fire vehicle radio installations continuing. Installations in the remaining vehicles of each department are proceeding
- ii. Legacy microwave dishes and LMR antennas are slowly being removed from the tower sites. Weather continues to slow down the removal, but task is almost complete
- iii. Punchlist revised and being reviewed by ACD. Items are being checked off as tasks are being completed
- iv. MCC7100 certification testing began December 1, 2017. Some issues with firewall identified and being addressed

### 3. Work Planned for Next Week

- i. Continue removal of legacy microwave dishes and legacy LMR antennas, as weather permits
- ii. Continue fire vehicle radio installations
- iii. Continue to work off punch list items
- iv. New combiner installation completed
- v. Site 5502 conversion to simulcast completed on December 6, 2017. Site has now joined simulcast and performing well
- vi. Address MCC7100 firewall issues and re-test

### 4. Open Issues

- i. GPS location services implementation stalled due to lack of contract between Allegan County and New World. J. Ludwig reached out to Motorola to explore other solutions. Motorola and MPSCS has meeting on December 8, 2017 and identified
