COVID-19 Update

January 12, 2022

Executive Summary: COVID-19 Mass Testing and Containment Plan

MITIGATION ROADMAP

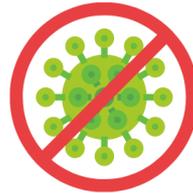

INCIDENT ACTION PLAN OBJECTIVES

1. Identify cases, isolate the sick, quarantine the exposed, and protect vulnerable populations

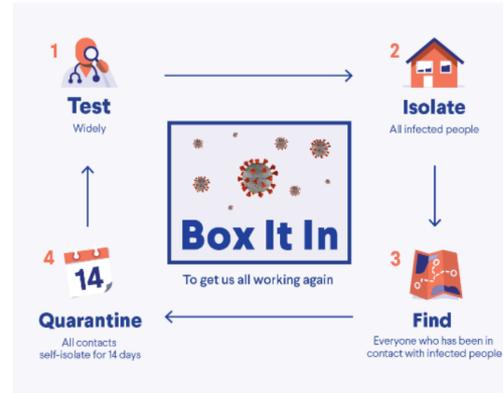

Provide information to the public, media, and County staff to increase public awareness, address misinformation, and protect the public and increase community resiliency
2. Prepare, mitigate, and recover from widespread transmission in Allegan County

Household Contacts to a Confirmed Case (12/25/21-1/7/22):

5-10 years: 37.5%
11-13 years: 32.4%
14-17 years: 22.4%

K-12 school clusters and outbreaks, recent and ongoing, week ending Dec 29

Number of reported outbreaks/clusters decreased since last week (412 to 365), with decreases in Pre K-Elementary (221 to 195), and High Schools (110 to 102), and Middle/Jr High (81 to 68). Administration (0 to 0) remained the same.

Region	Number of reported cases, #	# Ongoing - Excluding New	# New	Number of outbreaks	Range of cases per outbreak
Region 1	1,140	10		65	2-82
Region 2n	456	17		44	5-54
Region 2s	351	37		46	3-44
Region 3	2,842	14		119	3-100
Region 5	71	15		17	3-17
Region 6	291	17		43	2-54
Region 7	177	0		11	3-51
Region 8	378	0		20	3-51
Total	5,706	110		365	2-99

Grade level	Number of reported cases, #	# Ongoing - Excluding New	# New	Number of outbreaks	Range of cases per outbreak
Pre-school - elem.	2,279	67		195	2-62
Jr. high/middle school	1,221	0		68	3-82
High school	2,206	43		102	2-100
Administrative	0	0		0	4
Total	5,706	110		365	2-99

Many factors, including the lack of ability to conduct effective contact tracing in certain settings, may result in significant underreporting of outbreaks. This chart does not provide a complete picture of outbreaks in Michigan and the absence of identified outbreaks in a particular setting in no way provides evidence that, in fact, that setting is not having outbreaks. Week of 12/16 98% LHDs reporting due to technical difficulties. NOTE (10/4): MDHHS adopted the new [CSTE school cluster and outbreak definition](#), which impacts how transmissions within school-sponsored settings are reported to the health department.

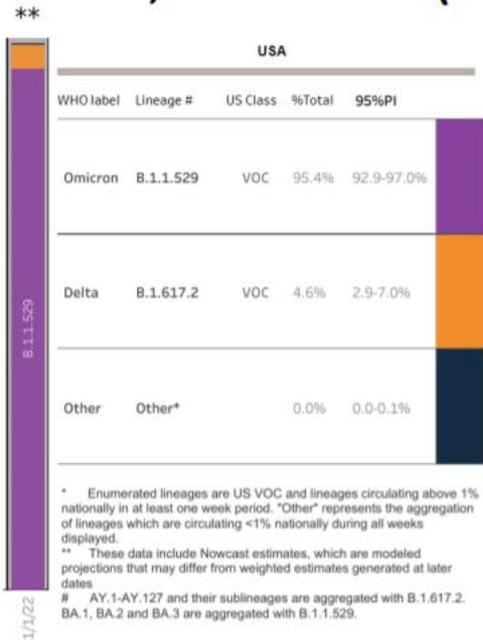

Source: LHD Weekly Sitreps

As of 1/6/22, ACHD has identified **4 ongoing** outbreaks and **1 new** outbreaks.

- 1 Child Care/ Youth Program
- 1 Long term care facilities (LTCF)
- 3 Business settings

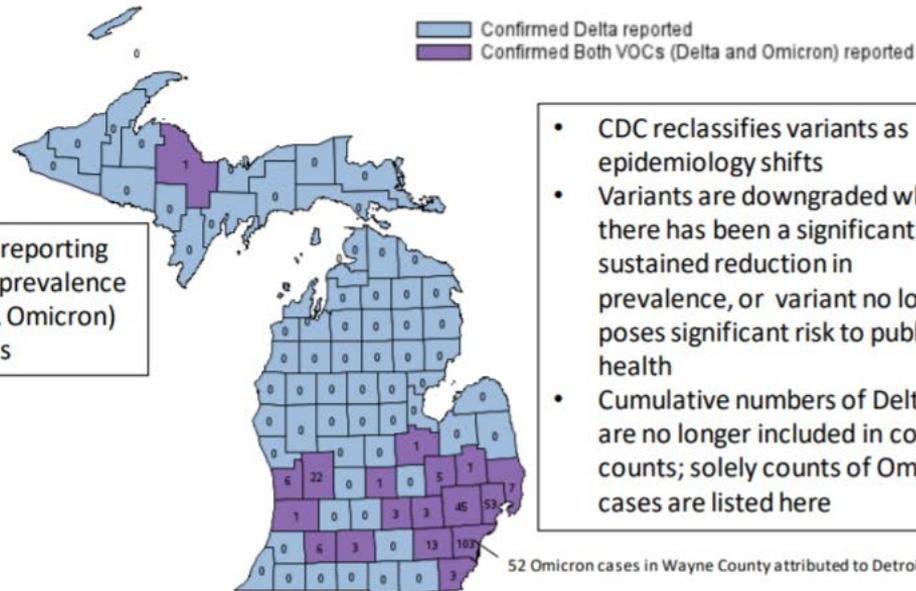

Identified COVID-19 Cases Caused by Variants of Concern (VOC) in US and Michigan

SARS-CoV-2 Variants Circulating in the United States, Dec 26 – Jan 1 (NOWCAST)

Currently, CDC is reporting rapid increase in prevalence of B.1.1.529 (i.e., Omicron) over past 3 weeks

Variants of Concern in Michigan, Jan 3

Variant	MI Reported Cases	# of Counties	MDHHS VOC Sequenced Prev. %
B.1.617.2 (delta)	29,704	83	68.1%
B.1.1.529 (omicron)	289	18	31.9%

Allegan County has 2 reported Omicron variant cases (as of 1/10/22). **Note: not every positive case is serosequenced for a variant.**

We have the tools to fight Omicron:

- ▶ A well-fitting mask can offer protection against variants, even if you are fully vaccinated.
- ▶ In addition to getting vaccinated, get a booster dose if you are eligible.
- ▶ Testing can tell you if you are currently infected with COVID-19, so you can isolate and prevent spreading the virus to others
 - ▶ Consider taking an at home test prior to gathering with others
 - ▶ Stay home if you are sick, and self-isolate until you recover if you develop symptoms or test positive.
 - ▶ There are **free** [drive-thru testing events](#) for the public (Mondays, Wednesdays, and Fridays 12pm-5pm at the Allegan County Transportation Building)

Why Cloth Masks Might Not Be Enough as Omicron Spreads

Time it takes to transmit an infectious dose of Covid-19

		PERSON NOT INFECTED IS WEARING			
		Nothing	Cloth mask	Surgical mask	N95
PERSON INFECTED IS WEARING	Nothing	15 min.	20 min.	30 min.	2.5 hours
	Cloth mask	20 min.	27 min.	40 min.	3.3 hours
	Surgical mask	30 min.	40 min.	1 hour	5 hours
	N95	2.5 hours	3.3 hours	5 hours	25 hours

It will take 25 hours for an infectious dose of Covid-19 to transmit between people wearing non-fit-tested N95 respirators. If they're using tightly sealed N95s—where only 1% of particles enter the facepiece—they will have 2,500 hours of protection.

- ▶ ACHD sent a Memorandum on 1/11/22 to Community and School Leaders requesting masking until this surge subsides and we are no longer in high community transmission.
- ▶ Upgrading masks is an important item to consider with the Omicron variant, as cloth masks are showing not being enough against Omicron. KN95 and N95 masks for adults and children are more readily available for purchase now compared to the early days in the pandemic. The figure to the left shows the time it takes to transmit an infectious dose of COVID-19 when an infected person is wearing a mask and a not infected person is wearing a mask. It will take 25 hours for an infectious dose of COVID-19 to transmit between people wearing non-fit tested N95 respirators.

What Mask Should I Wear?

Along with getting vaccinated and boosted, experts recommend upgrading your mask if you want optimal protection.

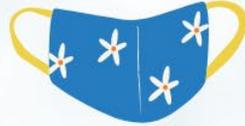

No Protection

No Mask or Improper Use

- Mask should fit over your nose and mouth and be snug against your face with no gaps
- Don't use masks that are damp, dirty or damaged
- Don't wear masks with exhalation valves, which allow virus particles to escape

Some Protection

Cloth Masks

- Washable and reusable. Masks should be washed at least once a day or as soon as they become dirty
- Multiple layers of woven, breathable fabric

If you don't have access to a high filtration respirator mask, double up. Single layer masks, such as bandanas and gaiters, are less effective, so wear a cloth mask with multiple layers or wear a cloth mask over a surgical mask. Be sure your mask fits properly—nose wires improve fit.

Surgical Masks

- Disposable, intended for one time use
- Multiple layers of non-woven material
- Provides protection against large droplets

Most Protection

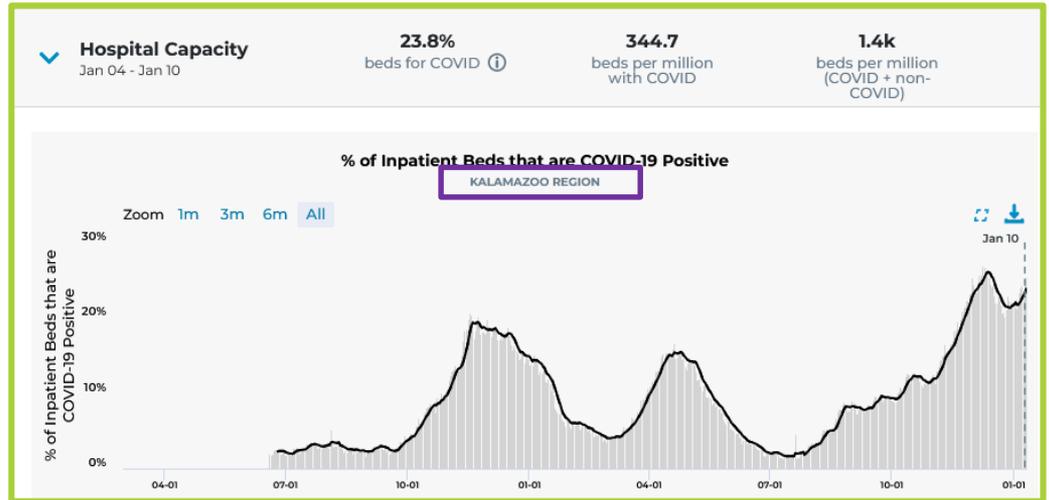

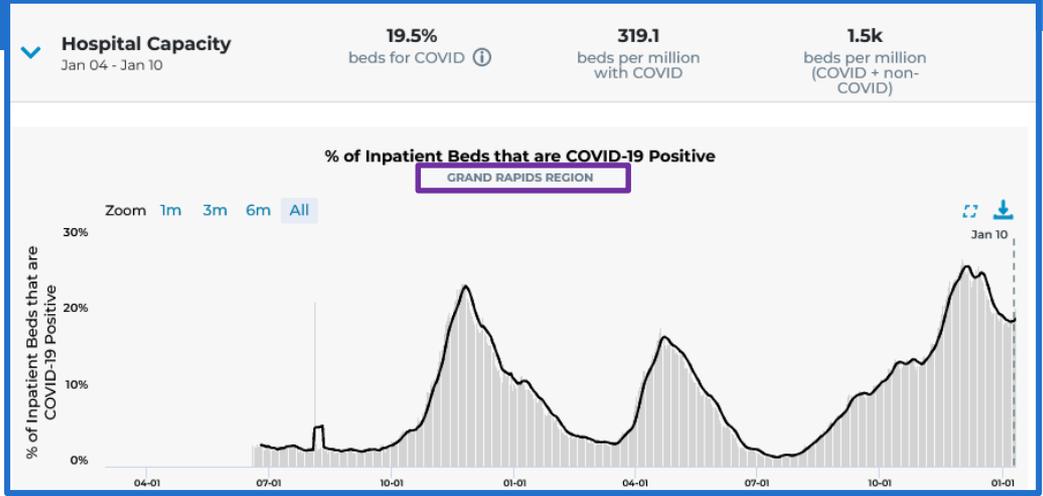

High Filtration Masks

(Respirators – N95, KN95, KF94)

- Varies by mask type, but reusable up to 5 times with proper care
- Filters up to 95% of particles in the air
- Seals tightly to the face when fitted properly (some facial hair can interfere with this seal)
- Designed and regulated to meet international standards. Check lists of trusted manufacturers from CDC and Project N95 to avoid counterfeit masks

- ▶ Many Allegan County residents access hospital services in the Grand Rapids and Kalamazoo Regions.
- ▶ Grand Rapids Region (Region 6)
 - ▶ 19.5% of inpatient beds are treating COVID-19 patients
- ▶ Kalamazoo Region (Region 5)
 - ▶ 23.8% of inpatient beds are treating COVID-19 patients

Some smaller hospitals might not have ICU beds for COVID or non-COVID patients

Statewide Hospitalization Trends: Pediatric COVID+ Census

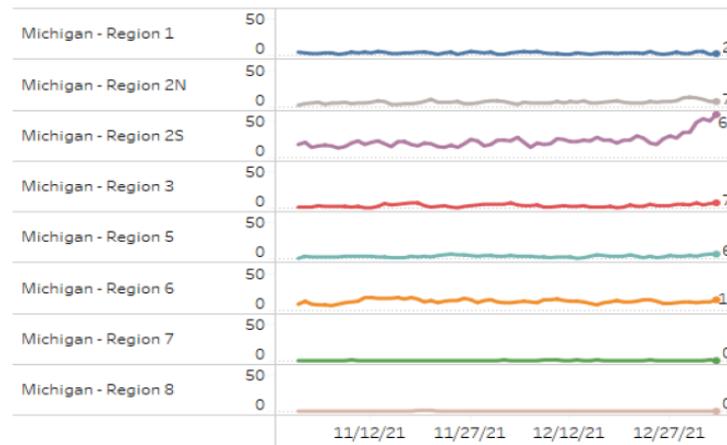

Hospitalization Trends 1/1/2021 – 1/3/2022
Pediatric Hospitalizations, Confirmed

Pediatric hospitalizations have risen significantly with the COVID+ census nearly doubling since last week and reaching a new record for the pandemic.

The increase is predominantly in Region 2S where two of the state's largest Children's hospitals are located.

Pediatric Hospitalizations by Region
(Nov 2021-Jan 2022)

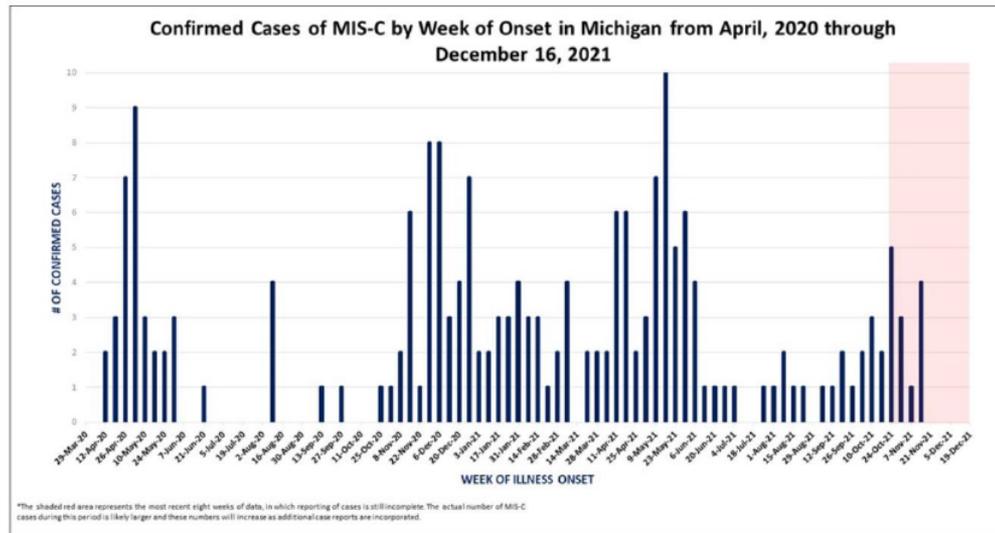

From 9/1/21 – 1/10/21, there have been 9 pediatric Allegan County residents hospitalized related to COVID-19

Multisystem Inflammatory Syndrome in Children (MIS-C)

Michigan Surveillance

- Higher community transmissions is followed by higher incidence of MIS-C cases
- 196 cases identified in Michigan
- More than 60% of those children are elementary and pre-school aged
- Black/African American children are disproportionately impacted
- 70.4% children with MIS-C are treated in the ICU

Red shading indicates the expected reporting lag for new cases. Cases with onset dates in this time period may not have been detected or reported yet.

There have been 0 reported MIS-C cases in Allegan County

Updated 1/10/22
Data as of 1/7/22

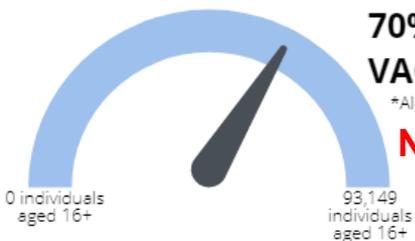

65.7%

**70% OF ELIGIBLE INDIVIDUALS*
VACCINATED BY END OF 2021**

*Allegan County residents age 16+

Not Met

As of January 7, **66,039** people have been vaccinated**

17,935 people ages 65 and older have been vaccinated**

**Individuals given at least 1 dose of vaccine. On 11/9, we began including the population 5 years and older.
(a) MI Population estimates for Allegan County from Vital Records

Over 1 in 2 individuals are fully vaccinated (54.6%).

Over 4 in 5 individuals aged 65 and older are fully vaccinated (82.5%).

Fully Vaccinated: Individuals (5 years and older) receiving 2 doses of Pfizer or Moderna or 1 dose of J&J.

Total Doses Distributed*

127,710

Primary Series Doses Administered*

120,262

Additional/Booster Doses Administered*

28,734

*includes Moderna, J&J, Pfizer, and Pediatric Pfizer Vaccines

*based on person's residence.

PLANNED CLINICS

ACHD has vaccine clinics available by appointment only at the health department.
To schedule an appointment, visit www.allegancounty.org/covid

Note: Our goal of vaccinating 70% of the population accounted for the 16 and older population. With increasing the eligibility population, our vaccine coverage decreased. We are continuing to strive towards our goal of vaccinating 70% of residents 16 and older, which will reflect on the gauge at the top of this graphic.

6/1/2021 Update: Previous vaccine graphics included 96,451 as the population of Allegan County residents 12 years and older. After further review, 99,878 is a more accurate population estimation.

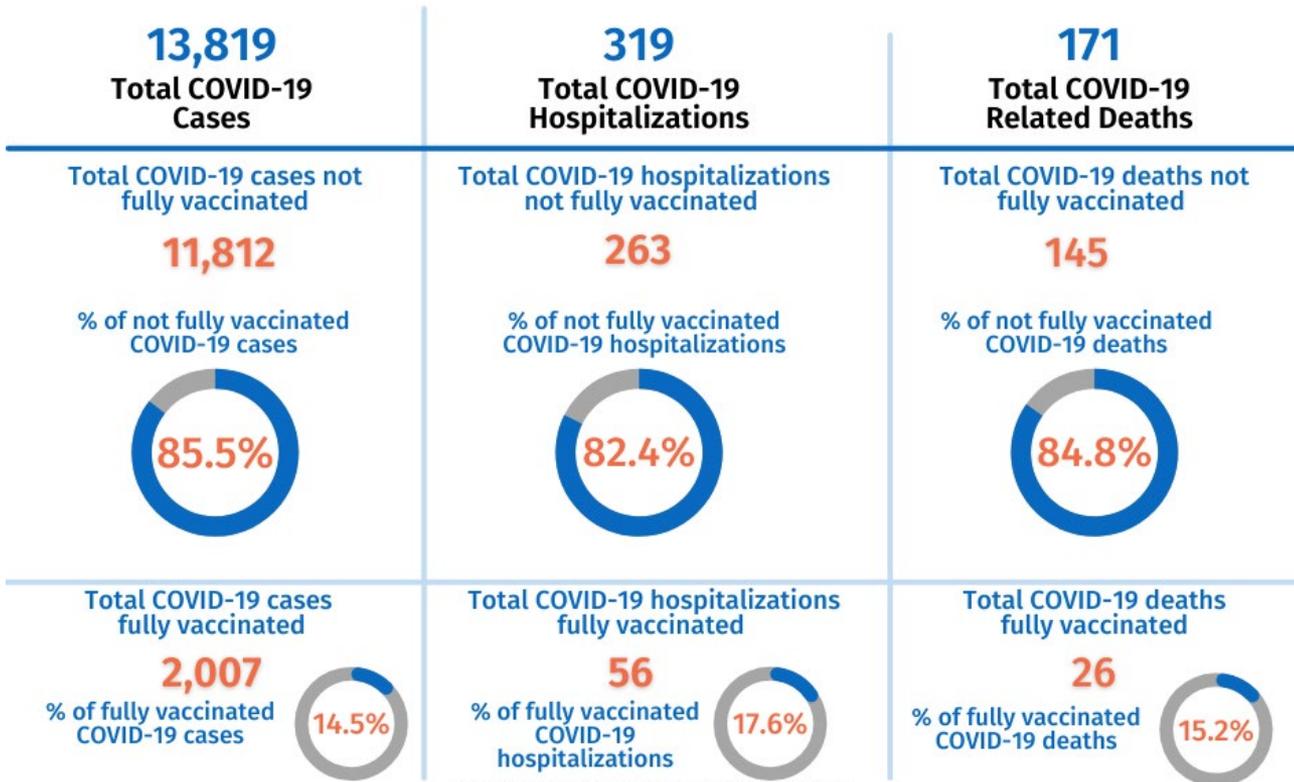

HEALTH Department

On 11/9/21, we added the 5-11 population estimates to the eligible populations for vaccine. This changed the percentage of initially vaccinated and fully vaccinated.

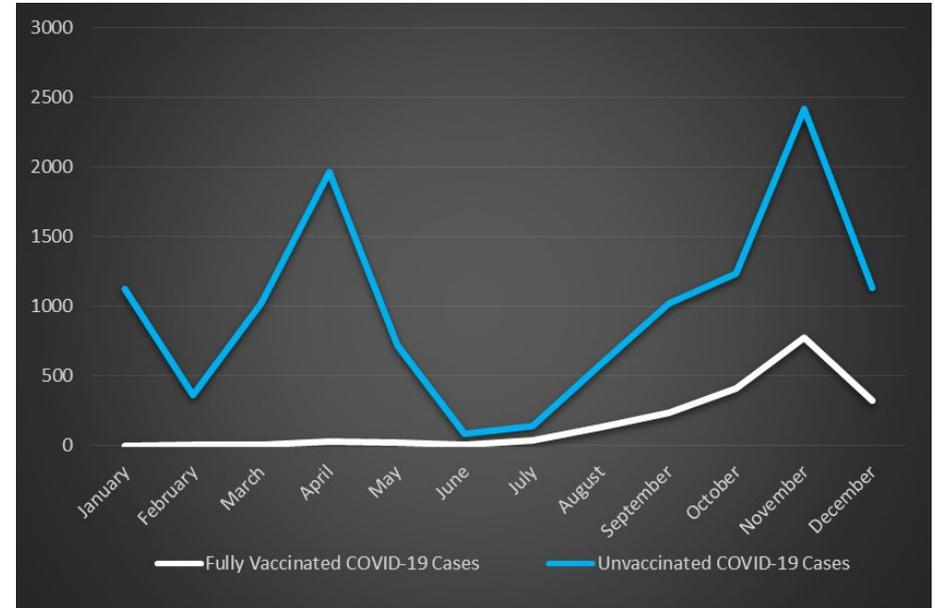

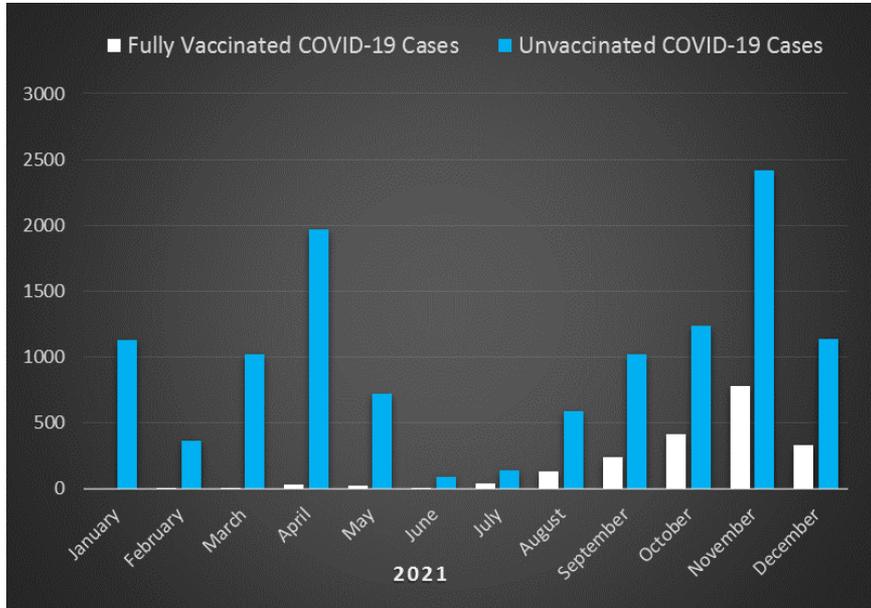

Allegan County Case Data by Vaccination Status ALL AGES

Since January 2021, there have been:

Data from January 1, 2021 to December 17, 2021

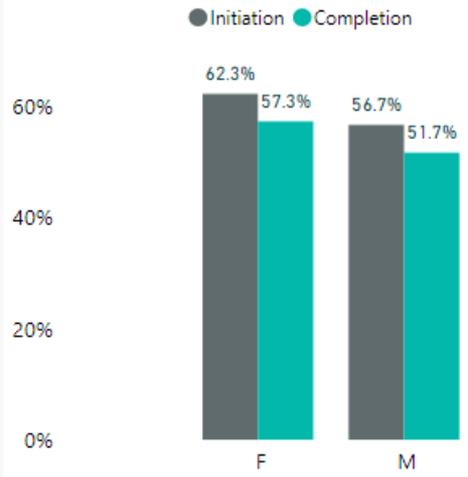

Allegan County COVID-19 Fully Vaccinated Cases vs. Unvaccinated cases from 01/01/2021 to 12/17/21

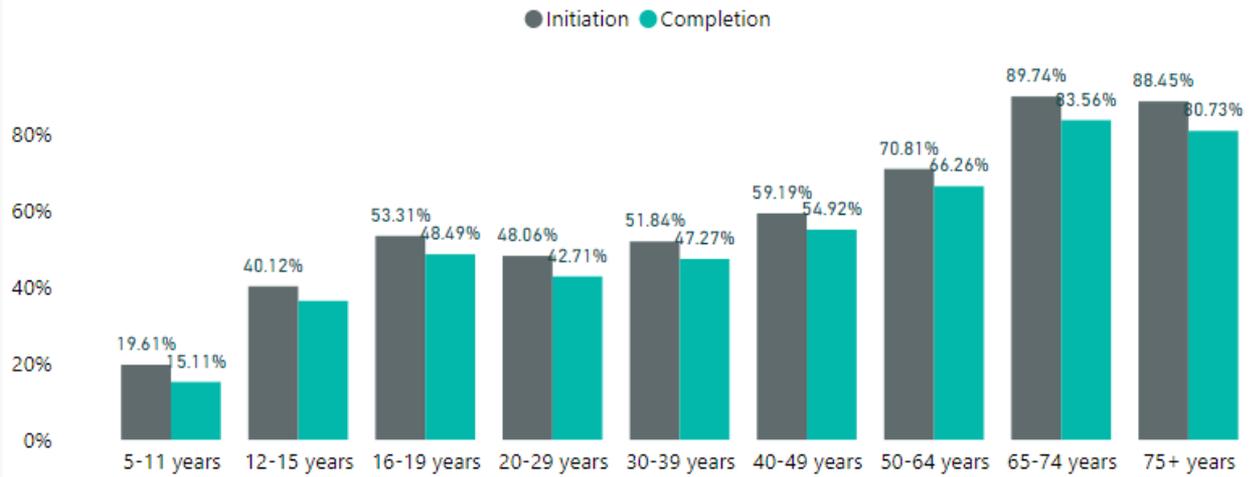

The graphs above show a comparison of fully vaccinated cases and unvaccinated cases on a monthly basis. As the graph indicates, the number of breakthrough cases have increased since July 2021. However, the number of unvaccinated cases have continued to outnumber the fully vaccinated cases each month.

Allegan County Vaccination by Gender and Age Group, As of January 7, 2022

COVID Vaccine Coverage by Sex

COVID Vaccine Coverage by Age Group

Age 5-11
 Initiated: 2,164: 19.61%
 Completed: 1,668: 15.11%

Age 12-15

Public Health COVID-19 Advisory: Level of Community Transmission: High

Allegan County Health Department strongly recommends everyone to:

Wear a mask in public

In settings with a lot of people (restaurants, festivals, fairs, events, stores, etc.), wearing a mask provides you extra protection

Get a COVID-19 vaccine and booster

This helps lessen the impact of severe illness, resulting in hospitalization or death

Actions including **social distancing, frequent handwashing, screening and testing,** and **isolation/quarantine** help lessen the level of transmission

HEALTH
Department

#DoYourPart

TOOLS THAT HELP PREVENT COVID-19 IN SCHOOLS/BUSINESSES

ACHD is imploring community leaders to implement universal masking in indoor public spaces into the near future. **We need to not only decrease transmission, but protect hospital capacity, businesses can provide services without interruptions, and minimize unintended financial impacts to families in our community.**

Federal OSHA's COVID-19 Emergency Temporary Standard for Vaccination and Testing

- ▶ Since the 6th Circuit lifted the stay on Federal OSHA's COVID-19 Emergency Temporary Standard for Vaccination and Testing 1910.501 (ETS2), applications have been filed with the U.S. Supreme Court for another emergency stay. It is anticipated that the U.S. Supreme Court will rule on the emergency stay by mid-January 2022. **Federal OSHA is requiring state plan states like Michigan to adopt ETS2 or equivalent by January 24, 2022.** The agency is closely monitoring the legal challenges while preparing for the deadline to adopt ETS2 to align with federal standards.
- ▶ To help workplaces prepare to comply with ETS2 and to answer questions, employers and employees can find helpful FAQs, fact sheets, templates and other helpful resources on the Federal OSHA website at [OSHA.gov/Coronavirus](https://www.osha.gov/Coronavirus). These resources include information on properly counting employees, customizable template plans employers can use for vaccine or testing strategies, and other important guidance.

EMERGENCY TEMPORARY STANDARD

COVID-19 Healthcare ETS

Statement on the Status of the OSHA COVID-19 Healthcare ETS

(December 27, 2021)

On June 21, 2021, OSHA adopted a [Healthcare Emergency Temporary Standard](#) (Healthcare ETS) protecting workers from COVID-19 in settings where they provide healthcare or healthcare support services. 86 FR 32376. Under the OSH Act, an ETS is effective until superseded by a permanent standard – a process contemplated by the OSH Act to occur within 6 months of the ETS's promulgation. 29 U.S.C. 655(c).

OSHA announces today that it intends to continue to work expeditiously to issue a final standard that will protect healthcare workers from COVID-19 hazards, and will do so as it also considers its broader infectious disease rulemaking. However, given that OSHA anticipates a final rule cannot be completed in a timeframe approaching the one contemplated by the OSH Act, OSHA also announces today that it is withdrawing the non-recordkeeping portions of the healthcare ETS. The COVID-19 log and reporting provisions, 29 CFR 1910.502(q)(2)(ii), (q)(3)(ii)-(iv), and (r), remain in effect. These provisions were adopted under a separate provision of the OSH Act, section 8, and OSHA found good cause to forgo notice and comment in light of the grave danger presented by the pandemic. See 86 FR 32559.

With the rise of the Delta variant this fall, and now the spread of the Omicron variant this winter, OSHA believes the danger faced by healthcare workers continues to be of the highest concern and measures to prevent the spread of COVID-19 are still needed to protect them. Given these facts, and given OSHA's anticipated finalization of this rule, OSHA strongly encourages all healthcare employers to continue to implement the ETS's requirements in order to protect employees from a hazard that too often causes death or serious physical harm to employees.

As OSHA works towards a permanent regulatory solution, OSHA will vigorously enforce the general duty clause and its general standards, including the Personal Protective Equipment (PPE) and Respiratory Protection Standards, to help protect healthcare employees from the hazard of COVID-19. The Respiratory Protection Standard applies to personnel providing care to persons who are suspected or confirmed to have COVID-19. OSHA will accept compliance with the terms of the Healthcare ETS as satisfying employers' related obligations under the general duty clause, respiratory protection, and PPE standards. Continued adherence to the terms of the healthcare ETS is the simplest way for employers in healthcare settings to protect their employees' health and ensure compliance with their OSH Act obligations.

OSHA believes the terms of the Healthcare ETS remain relevant in general duty cases in that they show that COVID-19 poses a hazard in the healthcare industry and that there are feasible means of abating the hazard. OSHA plans to publish a notice in the Federal Register to implement this announcement.

ACHD surveying local organizations : LAST CHANCE

- ▶ We are looking for areas for opportunities for improvement to support our local organizations. Please consider taking 5 minutes to fill out [this survey](#). Your insight and feedback is extremely valuable to us.

ACHD Prioritized Strategy: Testing

- ▶ Based on demand and access for community members, ACHD has worked to **increase testing availability** in our County and **decrease the number of vaccine clinics** ACHD offers.
 - ▶ Vaccines will still be available by appointment at the Health Department main location.
 - Our [Calendar](#) is up to date with scheduling links on clinic days
 - There are many other places for individuals to access vaccines – visit www.vaccines.gov
 - ▶ There are **free** [drive-thru testing events](#) for the public (Mondays, Wednesdays, and Fridays 12pm-5pm at the Allegan County Transportation Building)

Updated COVID-19 Quarantine & Isolation Guidelines

- ▶ On December 27, 2021, the Centers for Disease Control and Prevention (CDC) issued updated guidance which shortened the recommended isolation period for someone with COVID-19, as well as quarantine guidance for those exposed to someone with COVID-19. You can read the CDC's statement on the changes [here](#). See CDC's Isolation and Quarantine guidance [here](#).
- ▶ On January 10, 2022, MDHHS issued updated K-12 quarantine and isolation guidance, aligning with the CDC. You can read MDHHS's updated guidance [here](#).
- ▶ We have modified our isolation and quarantine guidance, effective immediately, to align with these new changes.

Updated COVID-19 Isolation and Quarantine Guidance

Adapted from [CDC guidance](#) 1/11/22

You **isolate** when you are sick or when you have been infected with the virus, even if you don't have symptoms.

You **quarantine** and stay away from others when you have been in close contact with someone who has COVID-19.

Regardless of vaccination status, take precautions for 10 days after exposure with someone who has COVID-19:

- Watch for symptoms
- Wear a well fitting mask for 10 full days after exposure, do not go places where you are unable to mask
- Avoid travel
- Avoid being around people who are at high risk
- If you develop symptoms, isolate immediately and get tested. Continue to stay home until you know your results and wear a mask around others

Isolation

If you tested positive for COVID-19 or have symptoms, regardless of vaccination status:

- Stay home for 5 days.
- If you have no symptoms or your symptoms are resolving after 5 days, you can leave your house. (Fever free for 24 hours without use of fever reducing medication)
- Continue to wear a mask around others for 5 additional days.
- If you have a fever, continue to stay home until your fever resolves.
- Avoid travel & avoid being around people who are at high risk

If you were severely ill with COVID-19:

- You should isolate for at least 10 days. Consult your doctor before ending isolation.

Quarantine

If you were exposed to someone with COVID-19

If you were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations then you should:

- Stay home and quarantine for at least 5 full days.
- Get tested: Even if you don't develop symptoms, get tested at least 5 days after you last had close contact with someone with COVID-19.

OR

If you were exposed to COVID-19 and are up-to-date with vaccination OR had confirmed COVID-19 within the past 90 days:

- You do not need to stay home unless you develop symptoms.
- Get tested: Even if you don't develop symptoms, get tested at least 5 days after you last had close contact with someone with COVID-19

Everyone 12 years or older is now eligible for a **COVID-19 booster!**

Immunity decreases naturally over time and cold weather makes viruses even easier to spread. A booster can help keep us and communities protected.

If you are 12+ years and got your initial doses of **Pfizer** at least **5 months ago**, you are now eligible for another dose.*

If you are 18+ years and got your initial doses of **Moderna** at least **5 months ago**, you are now eligible for another dose.*

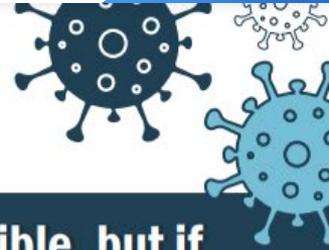

If you are 18+ years and got your initial dose of **Johnson & Johnson** at least **2 months ago**, you are eligible for another dose.*

*Talk to your health care provider to decide which booster vaccine is right for you. Pfizer is the only vaccine authorized and recommended for those 12 through 17.

For help finding a vaccination site, visit Michigan.gov/COVIDVaccine or call 2-1-1.

January 2022 Public Event Guidance

When supporting a business, store or restaurant:

- Consider taking advantage of **delivery and pickup services** when available.
- If visiting a business in-person, consider supporting businesses with **safety precautions** in place including masking, testing and distancing requirements for staff and patrons.
- Wear a well-fitting **mask** properly regardless of vaccination status, in accordance with [MDHHS' mask advisory](#).

Avoid large gatherings if possible, but if unavoidable use the following precautions:

(Examples include conferences, sporting events, festivals, concerts, or large weddings and parties.)

- **Do not** attend a large gathering or event if ill or within 10 days of testing positive for COVID-19.
- Wear a well-fitting **mask** properly regardless of vaccination status, in accordance with [MDHHS' mask advisory](#).
- **Test** right before the event and then again 3 days after.
- **Outdoor** events are safer than indoor events.
- Practice **social distancing** at the event if possible. This means being able to maintain 6 feet of distance from other event attendees.

MDHHS – Drinking Water Education Focus Group

- ▶ The Michigan Department of Health and Human Services is looking to get feedback from Michigan residents on an upcoming statewide drinking water education campaign. They will be holding focus groups with adults in Michigan this month. Each focus group will be held virtually using Microsoft Teams and will take two hours. If you participate in a focus group, you will receive a \$50 gift card as a thank you.
- ▶ **To learn more and sign up for a focus group, please [click here](#).** Please feel free to reach out to the focus group coordinator, Alaina Bur (abur2@michigan.gov) if you have any questions or concerns about this project.

Cold Weather Safety Tips

Prevent Frozen Pipes

Allow heated air to reach pipes. For example, open cabinet doors beneath the kitchen and bathroom sinks.

Car Care

Check your tires, antifreeze, and battery. Always clear off snow and ice before driving.

01

Layer Your Clothing

- Hat
- Scarf or knit mask to cover face
- Sleeves that are snug at the wrist
- Mittens
- Water-resistant coat and boots
- Several layers of loose-fitting clothing

02

03

Protect Your Pets

Like people, dogs and cats can get frostbite and should be kept inside during extreme cold temperatures.

04

HEALTH
Department

January 2022 is Radon Action Month in Michigan

- ▶ Exposure to radon is the second leading cause of lung cancer in the US
- ▶ Testing is recommended every two years because homes settle, new cracks form in the foundation and radon levels can change
- ▶ ACHD has radon test kits available for pick up Monday-Friday from 8am to 5pm

View more information: michigan.gov/radon, view press release [here](#).

**ACHD COVID-19 Updates
are held on the 2nd and
last Wednesday of every
month.**

COVID-19 vaccines are now available at ACHD on Thursdays and Fridays, by appointment only.

- ▶ COVID-19 Vaccination Available for anyone 5+* years
Moderna and J&J Booster Doses available for eligible individuals 18+
Pfizer booster doses available for 12+*
- ▶ Individuals will need to call the 269-673-5411 or visit our [website calendar](#) to schedule an appointment.

*Minors ages 5 to 17 will need a parent or legal guardian to accompany them to their appointment in order to provide consent to receive the COVID-19 vaccine.

Now anyone ages 5+ can get the COVID-19 vaccine.

Make an appointment today.

FREE

DRIVE THRU COVID-19 TESTING EVENTS

**Every Monday, Wednesday and
Friday: 12pm - 5pm**

**Allegan County Transportation Building
750 Airway Dr., Allegan**

FREE Drive-thru Rapid COVID-19 testing

Available to individuals of any age, regardless of symptoms.

Individuals under the age of 18 will need parental/guardian consent.

No pre-registration | No insurance needed | No doctor's note needed

NOTICE: In the event of severe weather, ACHD will cancel testing events for the protection of staff and residents. Please check our Facebook page @AlleganCountyHD or call 269-686-4546 for any cancellation notices the day of the event.

**HEALTH
Department**

GRATIS

CONDUCE A TRAVÉS DE EVENTOS DE PRUEBA DE COVID 19

**Cada Lunes, Miércoles, y Viernes:
1pm - 7pm**

**Allegan County Transportation Building
750 Airway Dr., Allegan**

COVID-19 rápido para conducir GRATIS

Disponible para personas de cualquier edad*, independientemente de los síntomas. Las personas menores de 18 años necesitarán el consentimiento de los padres / tutores.

Sin preinscripción | No se necesita seguro | No se necesita una nota del médico

AVISO: En caso de mal tiempo, ACHD cancelará los eventos de prueba para la protección del personal y los residentes. Consulte nuestra página de Facebook @AlleganCountyHD o llame al 269-686-4546 para recibir avisos de cancelación el día del evento.

**HEALTH
Department**

Expanded Testing Dates: Every Monday, Wednesday, & Friday testing events will be held from 12pm to 5pm at the Allegan County Transportation Building

Mitigation to Adaptation

COVID-19 Response

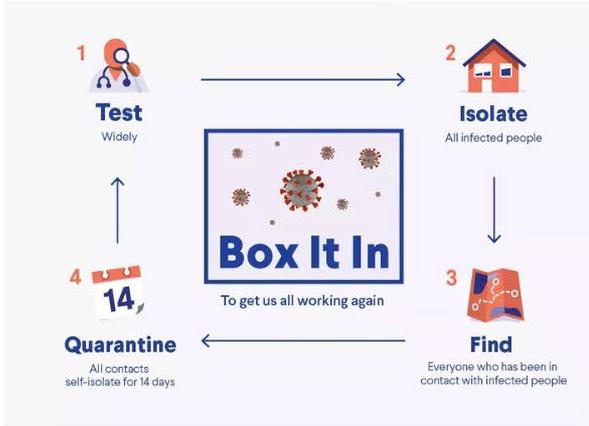

Given our current state, how do we move forward with adaptation? What resources are needed to do this?

Goal: Recover from the pandemic as a community with a low amount negative impact and high amount of community resiliency

Enhanced Ability to Test

Ensure timely access to testing for all residents

Testing is incredibly important to quickly identify cases moving forward. **This will help minimize transmission and prevalence of virus in community.**

Home Test Kits

Pharmacy Testing

Community Pop-up Testing

Provider Testing

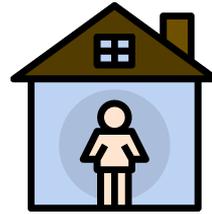

Robust Contact Tracing and Case Investigation

- Provide health education on actions to take
- Evaluate Required Quarantine practices

Local Public Health, based on resources, will only contact trace high risk environments. For non-high risk cases, positive individuals are responsible for notifying close contacts.

Letters of Exposure sent for high risk environments

Isolation when sick (required)

Cases telling close contacts

Quarantine when exposed (recommended).
Testing will allow for early detection of COVID.

Sufficient Health Care Capacity

- **Provide health education on actions to take**
- **Monitor capacity to include COVID and non-COVID health needs**
- **Surveillance on chronic and infectious diseases in Allegan County**

What chronic diseases in Allegan County may put people in the hospital?
(lung cancer, diabetes, obesity, etc.)

What other infectious diseases that may be circulating in our community?

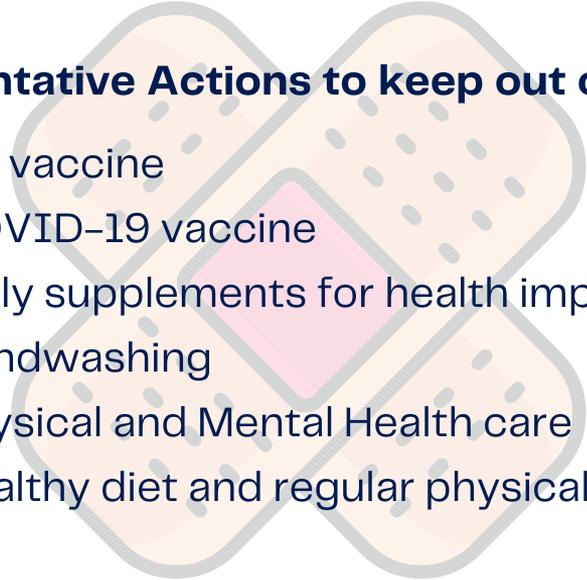

What other things should our community be monitoring?

What partnerships should be in place?

Preventative Actions to keep out of hospital

- Flu vaccine
- COVID-19 vaccine
- Daily supplements for health improvement
- Handwashing
- Physical and Mental Health care
- Healthy diet and regular physical activity

Best Practices for Organizations

- **Workplace policies that improve public health outcomes**
- **Expanding/Building relationships to improve broad public health outcomes**

Policies related to:

Diversity, Equity, Inclusion Health in All policies
Sick Leave

(ex [The Healthy Families Act](#) [Paid Sick Days](#))

Health Screenings

Enhanced Ventilation and
Cleaning

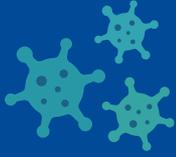

Considering social distancing or other barriers to put/keep in place when establishing work flow processes

Vaccine clinics on site (COVID-19, Flu, Hep A, Hep B, other vaccines for workforce)

Health Education to consider for Employer Wellness Programs

Consider sharing your business experiences with public health

Treatment, Community Vaccination and/or Herd Immunity

- **Determining clinic needs based on availability in the community and where people choose to get vaccinated**
 - **Is there a need for ACHD clinics?**
- **Surveillance for COVID-19 resistant variants (current challenge)**
- **Monitor vaccine rates and infection rates**
- **Implement Vaccine Plan for large vaccine events if needed (vaccine resistant variant)**
- **Ensure access to available COVID-19 treatments**

Socio-Ecological Model

The social ecological model looks at health broadly and focuses on multiple factors that might affect health (social, physical, cultural, environmental).

Evaluating Risk vs. Benefit for COVID and impact to greater community

Individual-level

- What brings value to your life/loved ones/friends?
- What are ways to be more healthy/protected to do those things?

Business/School/Organization Level

- What are your goals/objectives? What are ways to ensure a healthy workplace is in place to meet your goals/objectives?

Community Level

- How can we all work together?

Future State of Public Health Response

COVID-19 pandemic has demonstrated the intersection between health and impact on the economy.

ACHD has prioritized technical assistance to businesses, schools, and other organizations since the start of the pandemic to minimize outbreaks and absenteeism while providing services.

If businesses, schools, or other organizations would like continued technical assistance , then please consider sharing your experience with the Allegan County Board of Commissioners (BOC) at upcoming public meetings (December 9th, January 13th, or by email).

The BOC will consider allocating funding (at the January 13 BOC Meeting) to allow ACHD to continue providing technical assistance, timely case investigation/contact tracing, and other mitigation strategies (if no funding is received, the MDHHS COVID-19 grant funding will be spent by March 2022 and ACHD's response will not include technical assistance to organizations).
