

Compressed Gas Cylinders

Compressed gas cylinders, like small and large propane canisters pose an explosion hazard and contain a flammable gas.

Household hazardous waste collections occur three times annually, for details visit allegancounty.org/health/recycling-program or contact (269) 686-4559 for an appointment.

If possible, exchange for recycling at the time of purchase of a replacement cylinder.

Some scrap metal recyclers or commercial gas cylinder or welding suppliers may be able to help identify collection options.
